

Rite-Hite® WG-410 Dock Shelter.

WG-410

Rigid Frame Dock Shelter

Built with Rite-Hite's signature quality, the WG-410 rigid frame dock shelter offers unobstructed access to loads and economical environmental control.

- 1 **Raked header**
Diverts water off sides of unit.
- 2 **Durable C-4 style head curtain**
Rests with pressure on top of trailer, creating full-height clearance inside trailer.
- 3 **Rugged ArmorPleats™**
On corners of head curtain help extend product life. Available in extra tough, friction-resistant Durathon™ fabric for ultimate wear.
- 4 **"Twistable" fiberglass stays**
Resist cracking or breaking to maintain positive side curtain pressure against trailer. Stay ends are rounded and capped to prevent curtain wear-through.
- 5 **Available PitMaster™ seal**
Gaps large and small beneath and around the dock leveler are sealed with optional PitMaster components, providing substantial energy savings; improving cleanliness and sanitation.

Make sure your dock is protected.

The Rite-Hite® WG-410 rigid frame dock shelter provides both a form-fitting perimeter seal for the top and sides of docked trailers and full, unobstructed access to loads for efficient material handling. The WG-410 provides basic shelter protection, for year-round energy conservation and a more comfortable working environment.

The WG-410 dock shelter is part of the industry's most complete line-up of guaranteed environmental control products for the dock. All Rite-Hite products are custom-built to match your specific dock requirements. Ask your Rite-Hite Representative about these other popular solutions:

Survivor Dock Shelter.

Upgrade to a Survivor™ Impactable Shelter.

- » Damage-resistant side frame design
- » Advanced, rugged Neotec™ HMWPE side frames can take hits from off-center trailers that would destroy ordinary rigid frame shelters
- » V-Flow™ fabric header design naturally diverts water off sides of shelter

Add a RainGuard™ Weighted Trailer Top Seal.

- » Tightest header seal available to prevent infiltration of water, dust, wind or snow into the loading dock area
 - » Helps prevent costly product damage and contamination and maintain employee safety
 - » Weighted gravity-seal design and 15" (381 mm) trailer coverage range ensure tight, consistent seal regardless of trailer height or position
 - » Backed by standard 36-month money-back satisfaction guarantee
- ## Complete the Seal with PitMaster™ Under-leveler Seal.
- » Seals beneath and around dock leveler and bumpers
 - » Keeps pits and facilities cleaner; helps prevent infiltration of bugs, dust and debris
 - » Reduces costly heating or cooling energy losses at the dock
